

BENJAMIN NII ARYEE ANUE

Junior Front-End Developer | HTML • CSS • JavaScript • GitHub

Accra, Ghana | 0557678559 | niiaryeebenjamin1212@gmail.com

PROFILE SUMMARY

Self-taught front-end developer with practical project experience building responsive websites and web applications using HTML, CSS and JavaScript. Completed a three-month web development training programme through Thrive Africa and KTU, and developed projects including an e-commerce store, school management system, school website and developer portfolio. Seeking a front-end development internship to strengthen my professional experience, contribute to real-world projects and continue growing as a software developer.

SKILLS

- HTML5 & CSS3 — semantic markup, responsive layouts
- JavaScript — beginner level (DOM manipulation, interactivity)
- Git & GitHub — version control, repository management
- Responsive web development across device sizes

PROJECTS

PhoneHub — Phone Accessories E-commerce Site

- Built key UI components including a hero banner, product category cards, a customer reviews section and a repairs section.

School Management System

- Developed a web-based system to manage student and school records, resolving real-world setup and connectivity challenges along the way.

School Website

- Designed and built a school website, including content sections explaining the school's value to prospective families.

Developer Portfolio

- Created and refined a personal portfolio site, achieving full responsiveness across mobile, tablet and desktop screens; hosted on GitHub Pages.

TRAINING & CERTIFICATION

- 3-Month Web Development Course — Thrive Africa
- Certificate awarded through KTU (Koforidua Technical University), via the Thrive Africa programme
- Self-directed learning in web development, ongoing since November 2024
